GitHub - chain/chain: Chain Core Developer Edition ...

<https://github.com/chain/chain>

Chain Core Developer Edition can be run locally on Mac, Windows, or Linux to create a new blockchain network, connect to an existing blockchain network, or connect to the public Chain testnet, operated by Chain, Microsoft, and Cornell University's IC3.

Chain-Core-Server-1.2....

GitHub - docevaad/Chain: Micro ORM for .Net

<https://github.com/docevaad/Chain>

A major difference between Chain and other ORMs is that you don't need to manage connections or data contexts. A Chain data source is designed to be completely thread safe and will handle connection lifetime for you automatically.

Chain · GitHub

<https://github.com/chain>

Building Blockchain Networks. Chain has 10 repositories available. Follow their code on GitHub.

GoChain · GitHub

<https://github.com/gochain-io>

GoChain - the better smart contract blockchain. GoChain has 20 repositories available. Follow their code on GitHub.

QuarkChain · GitHub

<https://github.com/QuarkChain>

Grow your team on **GitHub**. **GitHub** is home to over 28 million developers working together. Join them to grow your own development teams, manage permissions, and collaborate on projects.

Openchain · GitHub

<https://github.com/openchain>

Enterprise-ready Blockchain technology. Openchain has 7 repositories available. Follow their code on GitHub.

WaltonChain · GitHub

<https://github.com/Waltonchain>

WaltonChain has 5 repositories available. Follow their code on **GitHub**.

BakeChain

<https://bakechain.github.io>

Bake **Chain**. Download; How It Works; Marketplace; About; Start Baking. Bake blocks on the Tezos blockchain with our simple to use multi-platform desktop application. Enjoy the intuitive and beautiful interface, without the hassle of working with the complex

command line tool. ... Download from **GitHub** . How it works. BakeChain works by ...

GitHub - blockchain-certificates/cert-issuer: Issues ...

<https://github.com/blockchain-certificates/cert-issuer>

Decide which **chain** (Bitcoin or Ethereum) to issue to and follow the steps. The bitcoin **chain** is currently best supported by the Blockcerts libraries. Follow the steps for the chosen **chain**.

GitHub Pages - Blockchain visualisation

<https://dailyblockchain.github.io>

Found this interesting :) Please send some Satoshis here to keep me going:
